# A flexible solution for a flexible workforce

Enable hybrid work simply and securely.

HOME > VIRTUAL WORKSPACE > WIRELESS OFFICE

## Wireless Office

Ericsson Wireless Office simplifies the delivery of virtual desktops, including applications, storage, and redundancy. Businesses can streamline hardware management and eliminate the need for fancy machines. Workers gain the freedom to securely access their desktops and apps from anywhere, using most popular devices, whatever the OS.

## Overview

### Simplify IT and support a flexible workforce

Imagine a finance firm has an urgent project. It needs to onboard a new contractor and give her access to its accounting software and sensitive client files right away. Building and shipping a laptop the traditional way could delay the project for a week. If the firm used a traditional VDI solution, with all its upfront equipment and setup costs, or a complex desktop-as-a-service solution, she'd likely be days away from starting. What if the firm's office manager could set up her up with a secure remote desktop – with all the apps and files she needs – quickly and easily? What if she could access her desktop from anywhere, using any of her own devices? Then they'd be in business.
